FEATURED PROJECTS & APPLICATIONS

1. LMS SkillVentura (RPG Gamified Learning Management System)

Tech Stack: LARAVEL • INERTIA.JS • REACT • TYPESCRIPT • MONGODB • RESTful API

A modern Learning Management System (LMS) engineered with RPG gamification elements (XP, leveling, character selection, and automatic PDF certificates) boosting student course completion rates.

Key Highlights: Gamified progress tracking, 15+ secure RESTful APIs via Inertia.js, scalable MongoDB structure.

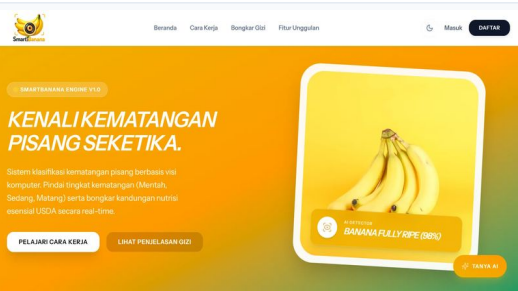

2. Nutrivision (AI-Powered Instant Nutrition Assistant)

Tech Stack: PYTHON • FASTAPI • REACT • TYPESCRIPT • POSTGRESQL • COMPUTER VISION

AI-powered nutrition analysis and calorie detection application capable of extracting instant food macronutrients (protein, carbs, fat, calories) directly from user-uploaded meal photos.

Key Highlights: FastAPI backend optimized for <500ms AI model response time, PostgreSQL nutrition log.

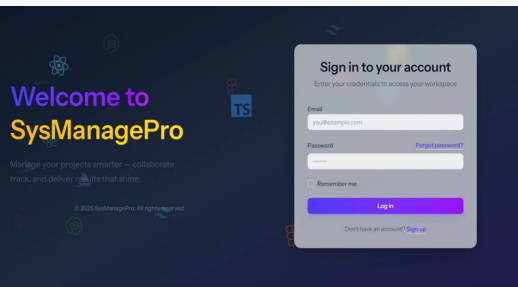

3. SmartBanana (AI Computer Vision Supply Chain Monitoring)

Tech Stack: PYTHON • FLASK • DEEP LEARNING • REACT • TYPESCRIPT • MYSQL

Supply chain monitoring and real-time banana ripeness classification platform utilizing AI Computer Vision deep learning algorithms to track fruit quality throughout distribution.

Key Highlights: Real-time image inferencing engine, distribution analytics dashboard, inventory management.

4. ProManageSys (Enterprise Team Collaboration & Kanban System)

Tech Stack: LARAVEL • REACT • TYPESCRIPT • MYSQL • CLEAN ARCHITECTURE

Comprehensive project management platform facilitating seamless team collaboration, interactive Kanban task boards, role delegation (admin/manager/member), and progress charts.

Key Highlights: Interactive drag-and-drop Kanban, MySQL many-to-many relationship query optimizations.

5. SiPresens (Real-Time Geofenced Attendance System)

Tech Stack: LARAVEL • REACT • TYPESCRIPT • POSTGRESQL • GEOFENCING API

Employee and school attendance management system with real-time GPS coordinate check-ins, anti-mock location detection, and automated HR monthly report generation.

Key Highlights: 50% reporting time reduction via automated generation, 100+ active daily users supported.

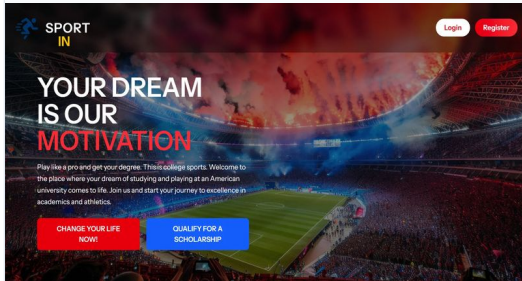

6. MyClassyTask (AI-Driven Intelligent Task Scheduler)

Tech Stack: LARAVEL • GEMINI AI • REACT • TYPESCRIPT • MYSQL

AI-assisted task management application that parses natural language task descriptions into subtasks, priorities, and deadlines automatically using Gemini AI integration.

Key Highlights: Smart priority scheduling, automated task nesting, Gemini LLM text parsing.

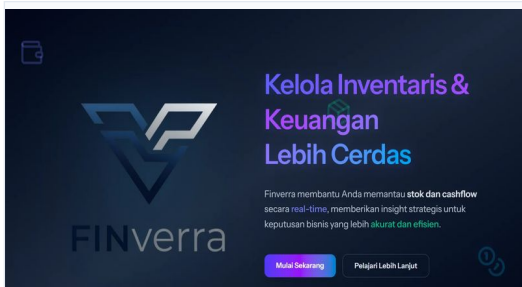

7. SportIn (Sports Venue Booking & Player Matchmaking Platform)

Tech Stack: LARAVEL • REACT • TYPESCRIPT • MYSQL • PESSIMISTIC LOCKING

Online sports field booking and player matchmaking platform connecting sports enthusiasts, managing real-time slot reservations, and handling group player chats.

Key Highlights: Pessimistic transaction locking in MySQL to prevent double-booking, booking state-chart.

8. Finverra (Warehouse Financial Management System)

Tech Stack: LARAVEL • REACT • TYPESCRIPT • MYSQL • REPOSITORY PATTERN

Warehouse financial management application for cashflow tracking, real-time profit/loss reporting, warehouse rental billing, and inventory integration.

Key Highlights: Clean Architecture repository pattern, automated real-time financial reporting.

9. Mts Baitis Salmah (Academic Portal & News CMS)

Tech Stack: LARAVEL • REACT • TYPESCRIPT • MYSQL • INERTIA.JS

Integrated academic information portal and official news CMS serving 300+ students and administrative staff, featuring automated student report card grading modules.

Key Highlights: 30% report card preparation time reduction, 99.9% uptime for administrative workflows.

PRIMARY CERTIFICATION

Coding Camp 2026 powered by DBS Foundation – Full-Stack Web Developer

Issued by Dicoding Indonesia & DBS Foundation (July 2026)
