SUMMARY

Dedicated Full Stack Developer and Computer Science student focused on engineering reliable, scalable, and secure end-to-end software applications. Experienced in developing backend architectures using Laravel, designing secure RESTful APIs, and integrating interactive modern frontends with React and TypeScript. Skilled in database optimization (PostgreSQL, MySQL, MongoDB) and implementing organized DevOps workflows to deploy production-ready applications in real-scale environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer – SkillVentura (RPG Gamified LMS) November 2025 – Present

- Engineered a gamified Learning Management System (LMS) with RPG elements, boosting student engagement metrics by 25%.
- Structured database systems using MongoDB and integrated 15+ secure RESTful APIs via Inertia.js.
- Deployed 4 core interactive features (character selection, leveling, XP, and certification), increasing student course completion rates by 15%.

Full Stack Developer – SIPresensi (Attendance Management System) April 2026 – Present

- Created a real-time employee and school attendance system, reducing monthly reporting processing time by 50% via automated generation.
- Programmed backend services with Laravel and PostgreSQL, combined with a React frontend supporting 100+ active daily users.
- Implemented granular user role management and 12+ secure API endpoints, guaranteeing 100% data access compliance.

Full Stack Developer – NutriVision (AI-Powered Nutrition Assistant) February 2026 – Present

- Collaborated in a 4-member development team to build an AI-powered instant nutrition analysis and calorie detection application.
- Architected backend services using Laravel and PostgreSQL, optimizing AI model API response times to under 500ms.
- Designed 8+ responsive dashboard interfaces using React and TypeScript, enhancing mobile layout usability score by 40%.

Full Stack Developer – MTs Baitis Salmah Academic Portal May 2026 – June 2026

- Delivered an integrated academic information portal and official news CMS serving 300+ students and staff.
- Built automated grading modules, reducing teachers' report card preparation time by 30%.
- Utilized Laravel, MySQL, React, and TypeScript to sustain 99.9% system uptime and operational stability for administrative workflows.

SKILLS

Programming Languages: JavaScript, TypeScript, PHP, SQL, HTML5, CSS3, Python
Frameworks & Libraries: Laravel, React.js, Tailwind CSS, Inertia.js, FastAPI, Bootstrap
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Relational Database Design
Tools & DevOps: Git, GitHub, RESTful API, Postman, DevOps Workflow, Clean Architecture
Soft Skills: Problem Solving, Team Collaboration, Analytical Thinking, Adaptability

CERTIFICATIONS

Dicoding Indonesia: Belajar Fundamental Back-End dengan JavaScript (L4PQ9L2Q4PO1) • Belajar Back-End Pemula dengan JavaScript (DC-BE-JS) • Belajar Membuat Aplikasi Web dengan React (DC-APP-RCT) • Belajar Fundamental Aplikasi Web dengan React (DC-FUND-RCT)

EDUCATION

Coding Camp 2026 - Powered by DBS Foundation February 2026 - July 2026 Full-Stack Web Developer

Universitas Pamulang March 2024 – Present B.S. in Informatics Engineering – Software Engineering Focus

SMK Telekomunikasi Tunas Harapan July 2014 – June 2017 Computer & Network Engineering / Software Engineering
