PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with end-to-end experience engineering scalable, production-ready web applications from concept to deployment. Proficient in architecting robust backend systems using **Laravel 13** and dynamic user interfaces with **React 19** and **TypeScript**, backed by scalable SQL and NoSQL databases (PostgreSQL, MongoDB). Combines structured execution, proactive problem-solving, and clean architecture workflows to build high-reliability systems featuring automated queue pipelines, cloud storage, and secure biometric authentication.

WORK EXPERIENCE

Full Stack Developer – SkillVentura (RPG Gamified LMS & Quest Marketplace) *Nov 2025 – May 2026*

- Spearheaded the end-to-end system design and architecture of a gamified LMS and P2P Quest Marketplace using Laravel 12, React 19, and TypeScript, boosting student course completion rates by 15%.
- Architected core business workflows from scratch, including a P2P freelance bidding system, down payment validation, revision cycles, and an automated dispute/arbitration engine.
- Modeled scalable NoSQL data schemas in MongoDB to optimize stateful user progression, dynamic character leveling, and real-time XP calculation.
- Implemented an automated digital certificate pipeline utilizing DomPDF, canvas signatures, and direct AWS S3 storage with unique MD5 verification IDs.

Full Stack Developer – SiPresens (Integrated School Attendance & Academic System) *Apr 2026 – Jun 2026*

- Spearheaded the end-to-end architecture of an integrated school attendance ecosystem serving 4 distinct user portals (Admin, Teachers, Parents, and Students).
- Built an automated asynchronous WhatsApp notification pipeline via Laravel Queue Jobs, dispatching real-time attendance alerts and absence reports directly to parents.
- Integrated Cloudflare R2 object storage for medical leave proofs and deployed passwordless biometric authentication using @laravel/passkeys (WebAuthn).
- Architected a multi-format reporting engine delivering streaming CSV/Excel exports and print-ready PDF summaries, cutting school administrative processing time by 50%.

FEATURED TECHNICAL PROJECTS

Full Stack Developer & Architect – NutriVision (AI Dietary & Nutrition Platform) *Jan 2026 – Jun 2026*

DBS Foundation Coding Camp – Capstone Project (4-Member Team • CC26-PSU071)

- Architected and developed the full-stack web application for an AI dietary intelligence platform, orchestrating client interfaces, database schemas, and external AI services.
- Implemented Clean Architecture using the Repository Pattern with dynamic driver binding to decouple business logic from Supabase PostgreSQL data persistence.
- Architected an API integration pipeline combining a cloud Computer Vision microservice for meal detection with Groq LLaMA (3.3/3.1) for automated personalized dietary advice.
- Engineered responsive React 19 interfaces featuring real-time camera streaming via browser MediaDevices, dynamic macro tracking, and an interactive AI chatbot.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, SQL, HTML5, CSS3

Frameworks & Libraries: Laravel 13, React 19, Tailwind CSS v4, Inertia.js v3, Bootstrap

Databases & Storage: PostgreSQL (Supabase), MongoDB, MySQL, SQLite, Cloudflare R2, AWS S3

Tools & Architecture: Git, GitHub, RESTful API Design, Postman, Queue Jobs, WebAuthn Passkeys, Clean Architecture

Soft Skills: Critical & Analytical Thinking, Proactive Problem Solving, Structured Execution, End-to-End Ownership, Cross-Functional Collaboration

CERTIFICATIONS

Dicoding Indonesia & DBS Foundation: Coding Camp 2026 – Full-Stack Web Developer *Issued Jul 2026*

EDUCATION

Universitas Pamulang – B.S. in Informatics Engineering (Software Engineering Focus) *Mar 2024 – Present*

Expected Graduation: 2028 • Tangerang Selatan, Indonesia

Coding Camp 2026 - Powered by DBS Foundation – Full-Stack Web Developer Path *Feb 2026 – Jul 2026*

Comprehensive program covering modern frontend & backend architectures, cloud services, and capstone deployment.
